Surgery Information

Procedure to Perform: Dental Cleaning / Extraction(s)

Pre-Surgical Bloodwork

Pre-surgical bloodwork is an in-house chemistry panel that does an examination of your pet's liver and kidney function to help determine if your pet is able to handle general anesthesia today. Any abnormalities will be brought to your attention and the proper course of action taken. By checking "No" you decline the pre-surgical bloodwork for your pet. By checking "Yes" you give Hickory Small Animal permission to perform the pre-surgical bloodwork at an **additional cost of \$42.50**

Yes No

Pain Medication

After dental extraction, your pet will experience some pain. Hickory Small Animal Hospital offers post dental extraction pain medications to limit this discomfort and allow your pet to rest comfortably. We can give your pet a pain injection before surgery **for an additional \$13.00**.

Yes please give my pet a pain injection before the dental. No, do not give my pet a pain injection before the dental.

We can also send home pain medications **for an additional cost of \$_____**.

PAIN MEDICATIONS ARE HIGHLY RECOMMENDED

Yes please send my pet home with take home pain medication. No, do not send my pet home with take home pain medication.

Microchip Implantation

Hickory Small Animal Hospital can implant a pet identification microchip that can assist in finding your pet should it get lost. The microchip will be put in while your pet is under anesthesia. By checking "No" you decline microchip implantation for your pet. By checking "Yes" you agree to microchip implantation **for an additional cost of \$47.50**

Yes No

Dental Extractions

Teeth suffering with periodontitis, exposed roots, cracked/fractures or exposed pulp cavity need to be extracted. Extraction will prevent further damage to the alveolar bone and prevent tooth root abscesses. There is an additional charge for dental extractions depending on the condition of the tooth, which tooth is involved and whether it is an adult or baby tooth.

Yes, I give you permission to extract diseased teeth / baby teeth

No, do not extract any of my pet's teeth. I understand by doing so I will predispose my pet to oral disease and/or infection.

I hereby give the veterinarians and any authorized agents, staff, or representatives consent and authority to perform the following procedures or operations:

Signature of Owner/Agent
